In this study it was found that the maximum age-group was 18-59 years. The bakery owners were found to be male in 4 bakeries and in only one shop it was found to be female. The highest qualification was graduate among the bakery owners of the town. In all the shops the type of family was joint expect one. Except 3 bakeries, the other bakeries were found to have been I business or more than 10 years. All the bakery owners were full time workers in their business. Almost all the bakery item like bread, sponge cake, birthday cake, pop, bun, cream roll, biscuits, etc. were produced. These bakeries source of raw material was the local market and only one bakery uses raw material outside Sonari. Most of the bakery earned an income of 30,000-40,000. The expenditure pattern was found in the range of 10,000-20,000, while two owners expenditure was slight high in the range 20,000-30,000. These bakery owners provide employment to few individuals (01-15).
